

New Forest Log Cabins Ltd

Brook Lodge Chalet / Annex

Wooden Structures can be assembled with the ground of your house provided you have permission for a Temporary Building under Permitted Development or for a Mobile Log Home you will need a Certificate of Lawful Use. Brook Lodge costs around £38,000 to £42,000 for supply and build in your Garden or on your land and can meet the requirements of the planners for a temporary, or mobile structure if required, however, it is extremely Eco Friendly and with the optional full insulation package you can be sure your heating bills will be kept to a minimum..

Brook Lodge Solid Log Cabin

Garden Lodges are becoming a very popular solution for many families who are contemplating moving their nearest and dearest in their time of need which can often leave homes cramped and crowded.

The most ideal and environmental-friendly answer is to build a solid log Granny annex in your garden and offer a higher degree of independence for relatives than 'living in' the main dwelling.

New Forest Log Cabins Ltd

Brook Lodge Holiday Cottage

A Holiday Cottage needn't be just a room at the end of the garden to live in, it can also be a way of life with flexibility to double up as a weekend retreat for a staying guest, or the comfort of an office with separate lounge, WC and shower room. We offer a complete custom made design service and supply elevation drawing and floor plans to assist with planning permission if required.

Student Lodge Family Cabin

Student Lodges or Family Cabin Is an Energy Efficient, Environmentally Friendly log building constructed using a solid log exterior with insulated internal walls using a mixture of traditional Log Finish and plaster board in the Bathroom and Bedroom. If you need a 1 Bed Granny Annex or a Guest Cabin for Friends and Visiting Relatives, Brook Lodge will be there to greet them.

It's not always about size, sometimes it's about what works for you and the Pembroke Lodge certainly works for the aging mother who wanted to move closer to her son, but not in the same house and this really worked for both Mum and perhaps more importantly both her son and his wife and children. With one bedroom and open plan lounge/dining room and walk in shower room, we managed to fit everything in, including the kitchen sink...!

New Forest Log Cabins Ltd

Lodges of Distinction 300 Built to date..!

We utilise modern technologies in the process of building our Log Homes, we guarantee that only the highest quality materials go in to producing our log Buildings. Quality Control is used throughout every phase of production which is inspected in every phase of manufacturing such as:

- attention to detail and planning
- matching of fixings and components
- functioning of the windows doors

'THE GRANNY ANNEX'S are available in many standard model with custom designs, which have all the great features of a log cabin, such as high insulation value, strength, and the undeniable aesthetic beauty of natural wood. We have created a range on over 300 log building in the UK from Garden Retreat Cabins to Schools, Visitor Centre and Mobile Homes to mention just a few of the different types of constructions over the 16 years. We believe that you should have the freedom to choose that is unique to you and not be forced to accept mass produced standard models. With this in mind, we offer a complete design service and remain flexible enough to co-design with our clients, so if you have a particular layout in mind, we can provide you with a floor plan, 3D visual and a personal quotation free of charge.
